***Index Terms*—central server, ring token, multicast, mutual exclusion, distributed systems**

I. Mutual Exclusion Algorithms

A. Overview

Some algorithms do some things other algorithms do other things.

B. Central Server

C. Ring Token

D. Multicast

BibTeX does not work by magic. It doesn't get the bibliographic data from thin air but from .bib files. If you use BibTeX to produce a bibliography you must send the .bib files.

II. Comparison of Algorithms

TABLE I
Table Type Styles

Table Head	**Table Column Head**		
	Table column subhead	***Subhead***	***Subhead***
copy	More table copy[a]		

[a]Sample of a Table footnote.

Acknowledgement

This report acknowledges the teachings of Dr. Avinash Malik and Ms. Jesin James in the course COMPSYS 725: Distributed Cyber-Physical Systems taught at the University of Auckland in Semester Two of the year 2020.
